

BREAKTHROUGH LEARNING: What Practical Ideas Do You Want to Gather?

What: Six Advisory Councils + 75 minutes = opportunity to get behind the scenes!
Meet the people, see their tools, and understand their strategies.

How: Visit each breakout room, no formal presentations, just conversation and examples to show.

To Stay or Go: It's your choice! Stay as long in each room as you like, see a few or see them all. Every 10 minutes a chime will sound just to let you know how time flies!

Place for Notes or Contact information:

Advancing Partnerships with Patients and Families

"Action is the proper fruit of knowledge."
English Proverb

1. By next Tuesday, an action I will take is:
2. List an idea that hit a positive note for you. What action can you take to make this idea a reality?
3. If you could wave a magic wand, what changes would you make to advance partnerships between patients, families and health care professionals?

"Rather than thinking 'if and when', start doing, take action!"
